

Call for Innovators – FALL 2022*

Smart City Works Venture Labs is Open for Applications for the Fall 2022 Cohort

A SMART CITY WORKS SOLICITATION | JULY 2022

**We are now accepting applications for our Fall 2022.
The Fall cohort begins in October 2022.**

**This program will be hybrid.
Coursework, mentoring, meetings and events will be held both in-person and online.*

Smart City Works is a next generation cohort-based business accelerator for early-stage founder teams focused on solving urban challenges through infrastructure, SAAS systems, and IoT innovation. We are looking for start-ups with solutions that address significant gaps on timely social and civic challenges in cities.

For our Fall 2022 cohort, solutions must impact and improve one or more of the ways cities support daily life in areas to include, for example, working remote, energy storage and use, carbon capture and storage, food supply or disposition, waste reduction, autonomous transport, public safety, IoT device and data security,

and supply-chain integrity, among others. In particular, special consideration is given to companies focused on the following areas:

- ✓ **Sustainable Infrastructure/ Green Transport** - Solutions that reduce transportation costs, reduce congestion, improve safety and inter-modalities (i.e., between car, train, bus, bike, pedestrian), support 'last-mile' transport, or leverage autonomous (e.g., drone or AV) / intelligent transportation solutions and electric vehicle charging infrastructure. ****Special focus on support to EVs or Drone Delivery; Drone Public Safety; and Counter-Drone.**
- ✓ **Resilience, Public Health and Public Safety** – Solutions and/or IoT technologies that address the safety, security and resilience of urban dwellers; that mitigate the impact of pandemics, rising sea levels, extreme weather events, or other natural or man-made shocks; or that protect critical infrastructure. ****Special focus on pandemic-related Building and Transit health safety.**
- ✓ **Cybersecurity/ Use of Urban Data and IoT Technologies** - Solutions that can safeguard data sets and IoT communications at scale, to include technologies that utilize AI solutions to improve the value, use, and trust of data sets; or that leverage IoT technologies and devices to improve social trust, government and business processes, supply chain security, and/ or urban life. ****Special focus on support to solutions that help Build Trust/ Reduce Mis-information.**
- ✓ **Energy/ Carbon Reduction** – Solutions that increase the use and availability of renewables, foster greater energy storage capacity, convert waste to energy, reduce energy use or improve efficiency; reduce reliance on fossil fuels; cut pollutants like methane and soot; expand carbon sinks; or spur decarbonization. ****Special focus on Concrete and Pavement Materials that reflect heat as opposed to absorb it, decreasing the urban heat island effect; and Battery/ Energy Storage.**

Important Dates and Information

Application Deadline: This is a rolling admission process; applications will be processed as received. Applications open July 5, 2022. We will begin selecting companies on August 6, 2021 until the cohort is full. *Selections are on a first come, first serve basis.* Minority and women-owned businesses are encouraged to apply.

Cohort Start Date: **October 4, 2022**

Where to Apply: [ON F6S: <https://www.f6s.com/smartcityworks/apply> or ON GUST: <https://bit.ly/3S1cl0R>]
